Dramatic literature, the texts of plays that can be read, as distinct from being seen and heard in
performance.. The term dramatic literature implies a contradiction in that literature originally meant something
written and drama meant something performed. Most of the problems, and much of the interest, in the study
of dramatic literature stem from this contradiction.

Wisdom literature is a genre of literature common in the ancient Near East. It consists of statements by sages
and wise men that offer teachings about divinity and virtue. Although this genre uses techniques of traditional
oral story-telling, it was disseminated in written form.

Because parallel lines in a Euclidean plane are equidistant there is a unique distance between the two
parallel lines. Given the equations of two non-vertical, non-horizontal parallel lines, $ax + by + c = 0$, the distance
between the two lines can be found by locating two points (one on each line) that lie on a common
perpendicular to the parallel lines and calculating the distance between them.

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.
