The chemical reaction metaphor has been discussed in various occasions in the literature. This metaphor describes computation in terms of a chemical solution in which molecules (representing data) interact freely according to re-action rules. Chemical models use the multiset as their basic data structure.

However, a microcomputer is of little use unless there are programs available to solve chemical engineering problems; In this book, I have put together a collection of BASIC programs that will help the practicing engineer be more productive and able to solve complex problems that are normally handled on mainframe computers.

FUNDAMENTALS OF CHEMICAL ENGINEERING - IDC-Online

2 CHAPTER 1 A Review of General Chemistry must recognize that reactions occur as a result of the motion of electrons. For example, in the following reaction the curved arrows represent the motion, or flow, of electrons. This flow of electrons causes the chemical change shown: $\text{Cl} - \text{H} - \text{H} - \text{H} - \text{C} - \text{Br} + \text{Cl} - \text{H} - \text{H} - \text{H} - \text{C} + \text{Br}$
