Transformative learning theory says that the process of "perspective transformation" has three dimensions: psychological (changes in understanding of the self), convictional (revision of belief systems), and behavioral (changes in lifestyle).. Transformative learning is the expansion of consciousness through the transformation of basic worldview and specific capacities of the self ...

From a sociological perspective, social norms are informal understandings that govern the behavior of members of a society. Social psychology recognizes smaller group units, such as a team or an office, may also endorse norms separately or in addition to cultural or societal expectations. In other words, norms are regarded as collective representations of acceptable group conduct as well as ...
