Card counting is a casino card game strategy used primarily in the blackjack family of casino games to determine whether the next hand is likely to give a probable advantage to the player or to the dealer. Card counters are a class of advantage players, who attempt to decrease the inherent casino house edge by keeping a running tally of all high and low valued cards seen by the player.

PyRTF-ng 0.9.1 has not parsed any of my RTF documents, both with the ParsingException. First document was generated with OpenOffice 3.4, the second one with Mac TextEdit. Pyth 0.5.6 parsed without problems both documents, but has not processed cyrillic symbols properly.. But each editor opens other's editor document correctly and without trouble, so all libraries seems to have a weak rtf support.

Is there a Python module for converting RTF to plain text
